

Seasonal changes

Knowledge organiser

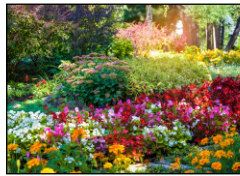

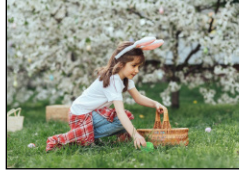

Year 1

Each year we have these **four seasons** - **spring**, **summer**, **autumn** and **winter**.

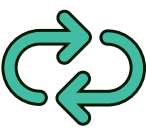

Seasons follow a repeating **pattern** in the same order every year.

Events that happen in **spring** and **summer**

	spring	summer
plants	 • buds and blossom appear • spring flowers – daffodils, tulips	 • trees have lots of green leaves • flowers bloom
animals	 • baby animals are born • birds build nests	 • insects visit flowers • baby birds leave their nests
weather	 • more rain • getting hotter	 • hottest season of the year • more sunshine than the other seasons
human	 • spring celebrations such as Easter	 • schools close for a long summer holiday

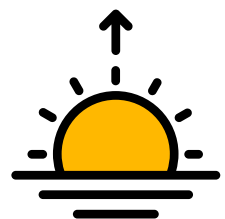

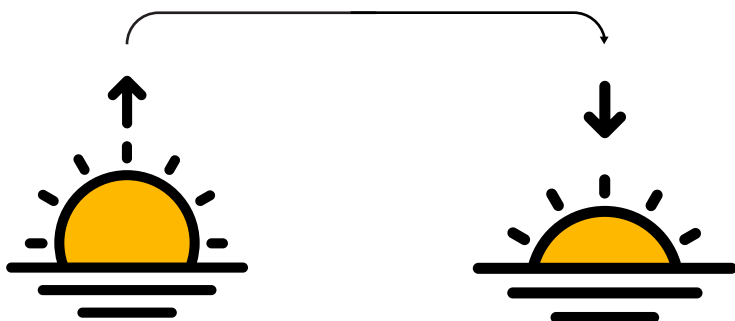

Key vocabulary

change 	daytime 	month 
observe 	pattern 	repeat 
safe 	time 	year 

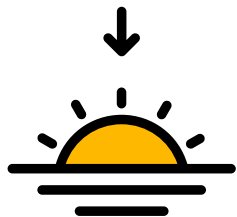

Daytime and night-time

Every day has a time when it is light (**daytime**)
and a time when it is dark (**night-time**).

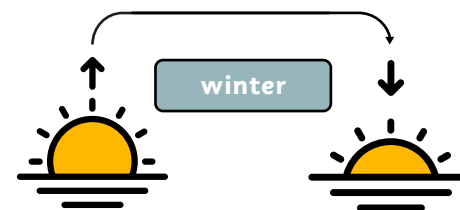

sunrise – when the Sun comes up in the morning and the day begins

sunset – when the Sun goes down in the evening and night begins

How daytime changes over the seasons

In winter, daytime is **short**.

In summer, daytime is **long**.

How to keep safe in the sun
